

There can be no social justice without economic prosperity, but economic prosperity without social justice is meaningless.

Many a times we come across the announcement in flights that "In case of Rapid change in pressure, the oxygen masks will drop from the panel above you. Please secure your mask first before helping others." Similarly the government helps itself first by reaching the level of economic prosperity and then it ^{starts} working for the social justice of its citizens as there can't be social justice without economic prosperity.

Let us now discuss about economic prosperity and social justice

Economic Prosperity :- A condition where a region or country is economically secure and stable and is growing continuously in the competitive marketplace Globally

Social Justice is the condition in which each and every citizen of the country should grow and develop in all aspects i.e. he/she must get all monetary & non monetary benefits. There should not be any discrimination to him/her

On the citizens of D

We, the human beings are divided on different basis like religion, sect, class, language, gender etc due to which still people are being treated differently. Despite having ~~(being)~~ economically prosperity people are facing discrimination in our society and are not getting the dignity which everyone should get as human beings.

There are many factors responsible for the division among us ~~as~~ due to which still people are facing difficulty in getting social justice.

The varna classification on the basis of birth left a deep impact on us as it is people are still experiencing the discrimination for example a boy named Ravi who was from Dalit community went for searching room as he has shifted to new town for his upper education. While searching for room Ravi (~~met conditions~~) ~~(to)~~ all necessary requirements) was ready to pay rent and fulfil all criteria but was

rejected after being ~~asked~~ asked about his caste. Thus economic prosperity without social justice is meaningless. ~~As it promotes~~

The Britishers also ruled us using communalism as a tool. Thus we can say that without social justice ~~the~~, economic prosperity is insignificant.

Economic prosperity is not a guarantee that ~~the~~ it will provide us respect and dignity in society.

Radhika a lady was asked to leave room when the owner came to know that she is H.I.V positive. We can say that social justice is very broad aspect and economic prosperity is just one part of it. ~~(Both are econ)~~

The economic prosperity and social justice must go hand in hand so that everyone gets the dignity ~~(along with)~~ and respect along with other benefits. ~~Both should act like two sides of coin complementing each other and~~

Both alone are insufficient for health of a nation.

The Economic Prosperity helps us to address the social needs first and provides the resources

The Economic prosperity helps us by providing the necessary resources for the social upliftment and to bridge the gap by minimizing

minimize the inequality.

Without Economic prosperity it is difficult to implement policies for equitable society

Our government today provides various programmes so that it can minimize the gap only because it is economically sound.

A government which is not economically sound will not be able to work for the welfare of its citizens.

Thus we can say that social justice and economic prosperity are like our both hands which we need for smooth functioning and progress. The role of one without another is insignificant as ~~(it will be difficult for us to grip)~~ thus we can conclude that "There can be no social justice without economic prosperity, and economic prosperity without social justice is meaningless."
